Topic 4: Making Choices

Part 4

Making Multiple Choices

group	time
A	10.00 a.m.
B	1.00 p.m.
C	11.00 a.m

```
if (group == 'A')
{
    System.out.print("10.00 a.m");
}
else if (group == 'B')
{
    System.out.print("1.00 p.m");
}
else if (group == 'C')
{
    System.out.print("11.00 a.m");
}
else
{
    System.out.print("No such group");
}
```

The '**switch**' statement

```
switch(someVariable )
{
    case value1: // instructions(s) to be executed
                break;
    case value2: // instructions(s) to be executed
                break;
    // more values to be tested can be added
    default:    // instruction(s) for default case
}
```

The '**switch**' statement:

An example....

group	time
A	10.00 a.m.
B	1.00 p.m.
C	11.00 a.m

```
switch(someVariable )
```

```
{
```

```
    case value1: // instructions(s) to be executed  
                break;
```

```
    case value1: // instructions(s) to be executed  
                break;
```

```
    // more values to be tested can be added
```

```
    default:      // instruction(s) for default case
```

```
}
```

```
switch(    group    )
{
    case value1: // instructions(s) to be executed
                break;
    case value1: // instructions(s) to be executed
                break;
    // more values to be tested can be added
    default:    // instruction(s) for default case
}
```

```
switch(    group    )
{
    case 'A':    // instructions(s) to be executed
                break;
    case value1: // instructions(s) to be executed
                break;
    // more values to be tested can be added
    default:    // instruction(s) for default case
}
}
```

```
switch(    group    )
{
    case 'A':      System.out.print("10.00 a.m");
                   break;
    case value1: // instructions(s) to be executed
                   break;
    // more values to be tested can be added
    default:      // instruction(s) for default case
}
}
```

```
switch(    group    )
{
    case 'A':    System.out.print("10.00 a.m");
                  break;
    case 'B':    // instructions(s) to be executed
                  break;
    // more values to be tested can be added
    default:    // instruction(s) for default case
}
}
```

```
switch(    group    )
{
    case 'A':      System.out.print("10.00 a.m");
                   break;
    case 'B':      System.out.print("1.00 p.m");
                   break;
    // more values to be tested can be added
    default:      // instruction(s) for default case
}
```

```
switch(    group    )
{
    case 'A':    System.out.print("10.00 a.m");
                 break;
